Yahoo! Shopping Mall Development of Logistics Data Visualization System

Summer 2017 @Yahoo Taiwan

WHY

There is no <u>unified</u>
<u>interface</u> for employers and
suppliers to get <u>real-time</u>
performance information of
logistics processes

HOW

- Step 1 Decided users, conducted users need assessment, investigated at distribution center
 - Step 2 Analyzed and identified totally 19 reports with 36 KPI, respectively in inventory management, inbound, outbound and return logistics
 - Step 3 Organized definition of each KPI, confirmed each data source in DB
 - Step 4 Unified different data sources with data preprocessing
 - Step 5 Constructed details of each data visualization dashboard, implemented data visualization dashboard prototype via Tableau
 - Step 6 Collected users feedback to improve visualization

WHAT

Inbound

Inbound punctuality rate

Incoming good inspection report

Receiving report of abnormality

- Processes Efficiency
- Return status
- Abnormality
- Usage of warehouse

Outbound

Pick slip report

Picking and packaging report

Picker productivity report

Shipping punctuality rate

Shipping report of abnormality

Return

Return goods inspection report

Rejected cargos report

Customer return report

Customer no pick up report

Inventory

Inventory turnover

Inventory cost

Warehouse space usage

Warehouse time usage

Unsalable inventory

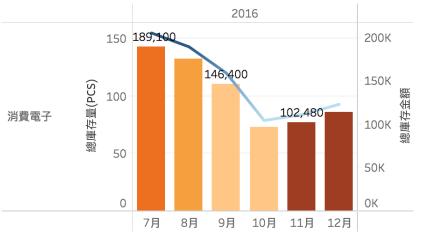

Short-expiration-date inventory

Not selling inventory

PROTOTYPE

Yahoo!奇摩 購物中心 庫存成本儀表板

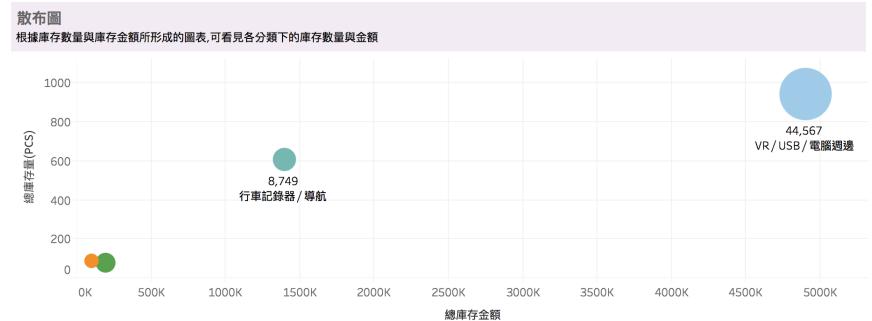

庫存查詢

可以查詢每個月中每一天的庫存數量與金額
